

Beat the heat

in your Club this Summer

With temperatures set to soar this summer isn't it time you took a look at Air Conditioning your Club with UK Hygiene?

We've been installing Air Conditioning for 35 years now and find ourselves getting busier and busier each year.

Call it people just wanting a better Club environment or even global warming, but the one thing we do know is that Air Conditioning is a real answer for Clubs.

Not only does it cool in the summer months but Air Conditioning can also heat. The latest Air Conditioning systems are very efficient and can compliment or even replace that old traditional heating system. So don't get left behind by other Clubs, keep those members happy and even encourage more to join your Club.

FREE

Install a UK Hygiene Air Conditioning system before September 30th 2007 and receive a **FREE** Samsung 26" LCD HDTV
